EDUCATION

Eastern Mediterranean
University

Information Systems and
Technologies
2022 - Present

TECHNICAL SKILLS

Backend

C# · ASP.NET Core MVC / Web
API

Entity Framework Core · SignalR

Database

PostgreSQL · MySQL · MongoDB

Frontend

JavaScript · TypeScript · React ·
Next.js

HTML · CSS · Bootstrap · Razor

Tools & Other

Git · GitHub · Postman · Swagger
Python · Node.js · Express.js · React
Native

AutoMapper

APPROACH

- Clean Code
- SOLID & DRY
- MVC architecture
- REST API design
- Problem solving
- Teamwork

AREAS OF INTEREST

- Web & Backend Development
- Information Technology (IT)
- Artificial intelligence
technologies
- Digital transformation & BPM

Instructor

MELİSA ALKAN

Web & Backend Developer | IT

PROFILE

I am an Information Systems and Technologies student focused on building a career in web and backend development. I develop projects using C#, ASP.NET Core, REST APIs, and database technologies. Through my internship, I have gained experience with corporate IT, digital processes, and system operations. I aim to contribute to software development and IT teams where I can take responsibility and continue strengthening my technical skills.

INTERNSHIP EXPERIENCE

IT and Digital Processes Intern | July 2026 - September 2026

Kaltun Maden - Çine / Aydın

- Worked with corporate forms and workflow structures in Bimser Synergy CSP, supporting the digitalization of BPM processes.
- Worked on form fields, data sources, and signature flows for processes covering product design, feasibility, planning, and management approval.
- Gained hands-on experience with data source queries, e-signature tracking, user authorization, and process completion steps.
- Gained practical experience in analyzing, documenting, and modeling corporate processes on low-code platforms.

SELECTED PROJECTS

RealTimeRestaurantNight | ASP.NET Core · SignalR · PostgreSQL

Web API and management panel for real-time restaurant order tracking. Implemented API testing with Swagger, data access with Entity Framework Core, and live order counters with SignalR.

Vitour Tour Management System | ASP.NET Core MVC · MongoDB · AutoMapper

Layered MVC application for creating, listing, updating, and deleting tours. Developed DTO structures, a service layer, MongoDB integration, and management interfaces.

Carola Web Application | C# · ASP.NET Core MVC · Razor

Web project built with a layered architecture, covering entity, data access, and user interface layers; implemented Razor Views and CRUD operations.

HIGHLIGHTED SKILLS

Backend Development

C#, ASP.NET Core, REST APIs, and service-layer
development

Corporate Processes

BPM, form design, and digital workflows

API & Databases

Relational/NoSQL data management and API integrations

Development Practices

Clean code, version control, and debugging

CAREER OBJECTIVE

My primary goal is to specialize in Web and Backend Development, focusing on C#, ASP.NET Core, API development, and database technologies. I am also open to opportunities in Information Technology (IT), corporate systems, and digital processes. I can consider career opportunities across different locations and work models, including remote, hybrid, and on-site roles.
